Introduction

EKI-7428G series switches are equipped with 24 Gigabit Ethernet ports plus 4 10G SFP+ ports. They are ideal for large-scale networks with server and surveillance applications, like high-resolution videos and images, requiring high performance and large-scale data transmission. The EKI-7428G-4XP features IEEE 802.3af/at PoE (Power over Ethernet) providing up to 30 watts per port and up to 400 watts of power budget, making it ideal for applications requiring PoE and higher speeds. Designed for rack-mount installation with 1U 19" design, the EKI-7428G series integrate layer 2 switching software, delivering wire speed across all ports up to 128 Gbps for layer 2 and network nodes. It also supports up to 60°C wide operating temperature against the harsh environment.
